

LL-100A Benchtop Laboratory Laminator

LL-100-A Benchtop Laminator

The ChemInstruments LL-100A Benchtop Laboratory Laminator is designed to consistently produce high quality laminations.

The LL-100-A Laminator's air pistons control the nip pressure evenly across the entire 22 inch wide laminating surface.

Adjustable controls provide flexibility to successfully laminate many different thickness and types of materials.

The durable construction of the Benchtop Laminator will provide many years of quality service.

- Produces laminated samples up to 22" (56cm) wide.
- Variable speed controller can be adjusted to laminate up to 15 fpm (4.5 mpm).
- Jog button or continuous operation.
- Laminations can be produced easily with single air pressure control regulators .
- 80 Durometer silicone rubber covered steel rolls.
- Rugged one-piece steel frame assures a long machine life.

Dimensions (approx.)

Height: 18" (46cm) LL-100-A
 Width: 40" (102cm)
 Depth: 11" (28cm)
 Weight: 64 lbs. (29 Kg)

Options

- Unwind Stand
- Gap Adjusters
- 240 VAC/50 Hz
- Brake Unwind Stand
